DATE: March 16, 2026
BULLETIN #: B2606
PRODUCT: EasyRA® Clinical Chemistry Analyzer Reagent Boxes
SUBJECT: Transition to Electronic IFUs for the EasyRA Reagents

Dear Customer,

This bulletin is to inform you of an upcoming packaging change for reagents used with the EasyRA Clinical Chemistry Analyzer. Effective March 2026, USB cards containing electronic Instructions for Use (IFUs) will no longer be included in EasyRA reagent kit packaging. Inventory containing USB cards may continue to be distributed until existing stock is depleted. All IFUs, including all language versions, will remain available electronically on our website. Printed copies will be provided upon request in accordance with applicable regulatory requirements.

IFUs may be accessed at any time by visiting our website www.medicacorp.com (Support/Instructions for Use). Users may search by catalog number, analyzer platform (EasyRA), and product type (reagents).

There is no impact on product quality, safety or effectiveness. There is no change to the catalog numbers, intended use, product performance. **This is a packaging update only.**

This transition complies with the U.S. Food and Drug Administration (FDA) electronic labeling guidance for IVD devices and Regulation (EU) 2017/746 (EU IVDR) provisions permitting electronic IFUs for professional-use devices.

Please ensure your sales teams and customers are aware that IFUs are available online and that printed copies may be requested through Technical Support

We appreciate your continued partnership and commitment to quality laboratory testing. If you have any questions regarding this update, please do not hesitate to contact us at EasyRAtech@medicacorp.com.

Sincerely,
Karen Wrona
Director of Marketing
